TEXTILE CASINGS FOR DRY SAUSAGE

TRADITIONAL. VERSATILE. CREATIVE.
Dry sausage (salami) enjoys great popularity among consumers and is one of the world’s favourite sausage types. The vast array of regional variations help make individual specialities out of dry sausage in many parts of the world. Each variation will have its own basic material – whether pork, beef or poultry - and the individual seasonings used and processing skills turn each sausage into a special creation, ultimately for the consumer to enjoy. However, the packaging of the sausage can be just as diverse and imaginative as the content.

The extensive Betex RS sausage casing range offers diversity in form and visual appearance and illustrates essential reasons for using textile casings. The key advantages of a textile sausage casing are above all its easy availability, simple handling and good ripening properties. In addition to this, textile casings can function as a modern marketing tool, linking high-grade basic materials with the opportunity for creative and bespoke designs. This catalogue presents the possible applications for using textile casings in dry sausage production.

THE COMPANY

Based in Wiesbaden, Germany, the Kalle Group is a leading supplier of industrially produced sausage casings. As an innovative partner for both the industrial and the butchery sector, Kalle is the market leader in value-added casings. This is a new segment created by Kalle based on delivering value in the form of colour, flavour and spice particulate transfer which subsequently provides gains to processors in efficiency, yield and food safety. Furthermore, it leads the world in fibrous and cellulose casings, to go along with a strong position in the polymer casing segment.

In addition to its innovative range of value-added casings, Kalle creates a steady stream of new and customized solutions for the manufacture of new products. Over the past 20 years, the company has enjoyed consistently strong growth.

The core business is making casings for sausages and other foodstuffs. However, Kalle also produces sponge cloths and supplies functional ingredients, high-quality aromas and flavours for the food industry.
